

GXH-LSA4DL

16 SEER—115V

HIGH EFFICIENCY: Provides cooling up to 23 SEER and heating up to 11.0 HSPF

ENERGY STAR®: A high efficiency system provides lower utility costs.

INTELLIGENT DEFROST: Monitors the frost on the coil surface and saves energy by defrosting when needed.

SELF-DIAGNOSTICS: A built-in computer using real-time diagnostics helps to prolong the unit's life. Automatic diagnostics continuously scan for malfunctions and provide fault codes to make troubleshooting easy.

QUIET OPERATION: Minimal operating noise makes this outdoor unit among the quietest in the industry.

ENERGY SAVINGS MODE: Automatically selects optimal compressor and fan speeds for energy savings while cooling or heating

INTELLIGENT PREHEATING: Monitors discharge air temperature, and delays the indoor fan until the coil is warmed up to prevent uncomfortable cold air blowing into the room.

WLRC4F

Controller Features

WIRELESS RF REMOTE CONTROL: The hand-held RF wireless controller is ergonomically designed and easy to use with a large display.

iFEEL MODE: The remote control senses the room temperature and adjusts airflow and temperature.

SLEEP MODE: Three sleep mode options automatically adjust the room's temperature. The slight shift in temperature significantly reduces energy consumption.
